

UNIVERSITY OF OVIEDO
Applied Economics Department

Oviedo, April 7th 2011

To whom it may concern,

The agreement between the INRS (Centre Urbanisation Culture Société) and the University of Oviedo for the exchange of postgraduate students came to an end on March 31st of this year. Although no exchanges have taken place during the course of the agreement, the University of Oviedo is interested in renewing the agreement for four more years. During this period a new Master in Applied Economics with specialization in Regional and Urban Economics will start at the University of Oviedo. The agreement with INRS and, in particular, with the SAREL (Spatial Analysis and Regional Economics Laboratory) would allow future students to come to Montreal to complete their studies.

In the hope that INRS is in agreement with a renewal, I await your response on how to proceed. Please write to me directly.

Kind regards,
